A Fine Fish Story. From the N. Y. World.

Prom the N. Y. World.

I was fishing up at Fort Lee on the Hudson one day, and had caught quite a mess of tom-cod and eels, when in pulling up my line after getting a good bite the fish got away. It was an old line, and on examining it I found that the snell had worn through the loop in the line, as the fish got away with hook and snell. I replaced the hook and was fishing about a half an hour afterwards, when I full something brush against the line. I jerked the line and then had quite a little tussle landing two good-sized tomcods, when to my surprise I found I had hooked one in the tail. In his mouth was the hook I had lost. The snell was caught around the head and gill of the other. It appears as though after the fish got away with my hook the other fish got away with my hook the other fish got entangled in the snell, and in their struggles brushed against my line, causing their capture. against my line, causing their capture.

"Filled a large order, wrote three letters, went twice to the bank and higgled with Branson until he threw \$9 off his bill."

"And that made you tired, ch? Well, I prepared three meals, baked six loaves of bread, got the children ready for school, mended all your clothes, cleaned the stairrods, stoned three pounds of raisins, picked five quarts of berries, weeded the flower-bed, whitewashed the cellar and chased an impudent tramp off the premises. And I don't say that I'm tired, either!"

American Hemp for Binding Twine. The secretary of agriculture says that the manufacture of binding twine for agricultural uses is an important and growing industry, and that he will investigate the subject of substituting hemp for the fibrous materials now it use, and as the area of climatic conditions for growing homp is larger in this country than for other fibrous plants, if it can be successfully and eco-nomically substituted in the making of binding twine, then so much of the estima-ted \$20,000,000 now paid for foreign growth will be saved and can be applied in the promotion of home industry.
